SUMMARY

- I am a software developer who focuses on writing clean, elegant and efficient code
- In my latest project I developed a fully-functional ecommerce website like Amazon. I designed it using HTML5 & CSS3, implemented frontend by React & Redux and built backend using Node & MongoDB.

SKILLS

- **Proficient:** JavaScript, React, Redux, Node.js, Express, MongoDB, HTML5, CSS3, Git, VS Code
- **Exposure:** Angular, Sass, PostgreSQL

PROJECTS

Full-Functional ECommerce Website | code | live

- A side project to create an ecommerce website like amazon that connects to Paypal.
- Learned SPA development using MERN stack.
- Challenges include connecting to paypal and user authentication using JsonWebToken.

One Page Shopping Cart | code | live

- A side project to create a simple shopping cart with instant feedback to the user.
- Learned React, Redux, React Router, Component Decomposition.
- Challenges include showing instant feedback on adding items to the basket and getting to know Redux.

EXPERIENCE

May 2019 -May 2020

ROI Vision, Montreal - *Web Developer*

- Improved user experience by replacing static charts with interactive charts using react-charts
- Implemented industry comparison feature in a growth hacking system using react and redux

EDUCATION

September 2017 - September 2019

Concordia University, Montreal - *Masters in Software Engineering*

- Created an automatic text summarization system using Python as thesis projects.

AWARDS

- Web Developer Certificate, bitdegree.org - 2019
- Professional Certificate in Front-End Web Developer, edx.org - 2019
